

## Teleradiology Turnaround Times

ANSWERS for you. For your patients.

### About

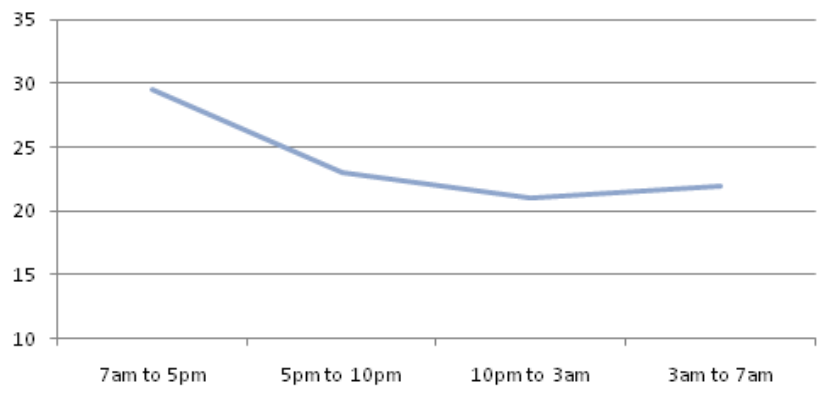

ONRAD's teleradiology turnaround times are consistently low. Every night, the Operations Team ensures that each study is complete and read as quickly as possible. ONRAD shares new turnaround time data every month. Check [www.onradinc.com/proof](http://www.onradinc.com/proof) for the most up-to-date information.

### Preliminary Reports vs. Final Reports

There is no distinction made between turnaround times for preliminary reports or final reports - that's because ONRAD radiologists treat both with the same level of urgency. For final report customers, there is no preliminary interpretation issued; the final report is delivered right away.

See our turnaround times and quality data at:  
[www.onradinc.com/proof](http://www.onradinc.com/proof).

### Teleradiology Turnaround Times

### ONRAD Supports Busy Emergency Departments

During the busiest time of night - 5pm=10pm - turnaround times are consistently below 25 minutes. ONRAD's fast, accurate reports help reduce patient wait times, while increasing ED throughput.
